Children's Residential Licensing

Issue when viewing Director Approvals

Description of functionality prior to Release 6.3P

A technical glitch was occurring intermittently for external users when viewing Directors' Approvals through the Licence Management module when reviewing licensing history. When opening a Director's Approval through the licensing history, the external user was able to view a Licence, Licence Letter, and Stage 2 Summary Report of another Service Provider.

Resolution with Release 6.3P

System enhancements have been implemented in SOR-RL to ensure that the intermittent technical glitch has been fixed and external users will not be able to view licensing information of another Service Provider when opening and viewing a Director's Approval in Licence Management module when reviewing licensing history.
